Objective

Motivated Computer Science student with experience in software development, data engineering, cybersecurity research, and technical problem-solving. Skilled in Python, SQL, JavaScript, React, Git, and database technologies, with a track record of building applications, supporting engineering projects, and analyzing data to drive improvements. Recognized for strong analytical thinking, adaptability, and collaboration across technical teams. Passionate about leveraging technology to solve real-world problems and contribute to innovative software solutions.

Education

- Virginia Commonwealth University, Richmond, VA
◦ Bachelor of Science in Computer Science
Expected Graduation: May 2028
- Reynolds Community College
◦ Associate Degree in Computer Science
GPA: 3.468 Dean's list
Graduation: May 2026
- Salam University, Kabul, Afghanistan
◦ Bachelor of Science in Computer Science
GPA: 4.0 Dean's list
Graduation: 2019-2023

Relevant Courses

Data Structures & Object-Oriented Programming • Algorithms & Advanced Data Structures • Programming Languages • Database Systems • Computer Organization • Computer Systems • Software Engineering • Data Communication & Networking • Theory of Computation • Discrete Mathematics • Linear Algebra • Calculus I & II • Statistics • Computing & Data Ethics

Skills

Programming Languages: Python, SQL, Java, JavaScript, PHP

Web Development: HTML, CSS, Tailwind CSS, Bootstrap, React.js, Node.js

Databases: PostgreSQL, MySQL

Data & Analytics: PySpark, ETL Development, Data Analysis, Data Visualization, Microsoft Excel

Tools & Technologies: Git, GitHub, Linux, Docker, Azure, Odoo, Visual Studio Code, Microsoft Office Suite

Software Development: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile Methodologies, Technical Documentation, Debugging & Testing

Engineering & Quality: Root Cause Analysis (RCA), Corrective and Preventive Actions (CAPA), Engineering Change Requests (ECR), Technical Drawing Interpretation, Quality Assurance, Process Improvement

Relevant Experience *(this can be paid or unpaid experience, volunteer, research, etc.)*

Engineering Technician, Anord Mardix, Richmond, VA
October 2025 - present

- Supported daily production operations across multiple switchgear lines by resolving technical, material, and design issues impacting output and quality.
- Acted as a technical lead on the production floor, coordinating with engineers, quality technicians, and assemblers to meet production goals.
- Reviewed 3D models, single-line diagrams, and BOMs to identify manufacturability issues and prevent production delays.
- Led and documented Engineering Change Requests (ECRs) to support continuous improvement and cost reduction. Provided hands-on coaching and troubleshooting support to operators and technicians to improve process understanding and performance.
- Partnered with Quality and Engineering teams to reduce rework and improve first-pass yield.
- Supported production planning by ensuring designs, materials, and documentation were production-ready.

Quality Technician, Anord Mardix, Richmond, VA

October 2024 – October 2025

- Monitored daily production quality performance across switchgear lines, ensuring compliance with safety and manufacturing standards.
- Identified process gaps and worked with production supervisors and engineers to implement corrective actions (CAPA, RCA).
- Authored and maintained SOPs and quality documentation to support operator training and certification requirements.
- Supported audits and ensured 99%+ compliance with internal and customer quality requirements.
- Served as a quality liaison between production and engineering teams to resolve recurring issues.

Software Developer, Netlinks Inc, Kabul, Afghanistan

January 2022 – November 2023

- Developed and implemented tailored Enterprise Resource Planning (ERP) systems, improving client workflow efficiency by 25%.
- Collaborated with cross-functional teams to design, test, and deploy software solutions, reducing deployment time by 20% using Software Development Life Cycle (SDLC) best practices.
- Designed and developed custom ERP solutions using Odoo, Python, PostgreSQL, XML, and JavaScript to automate business processes and improve operational efficiency.
- Built and enhanced a Hospital Management System (HMS) to manage patient records, appointments, billing, and reporting functions.
- Developed an Education Management System (EMS) to streamline student enrollment, course management, attendance tracking, and academic reporting.
- Participated in requirements gathering, database design, testing, debugging, deployment, and user support throughout the software development lifecycle.
- Utilized PostgreSQL for database management and optimization, ensuring reliable storage and retrieval of organizational data.

Software Developer, Blutelecas, NYC, NY

June 2024 – December 2024

- Contributed to the development of web applications using React.js and other modern frameworks.
- Collaborated with cross-functional teams to implement new features and enhance user experience.
- Gained hands-on experience in the full software development lifecycle (SDLC) and agile methodologies.

Academic Projects *(use this as a way to show what you've learned in class)***IoT & Cybersecurity Research Project, Reynolds, Richmond, VA**

June 2025 – July 2025

- IoT & Cybersecurity Research Project – As part of a summer research bootcamp, built a LAN network, configured Raspberry Pi with 8 sensors, simulated cyberattacks (DoS, DDoS, Slowloris), and co-authored two upcoming research papers on intrusion detection using real-world sensor data.

Leadership, or Student Organizations, or Activities

- VBA Fellow, Virginia Bankers Association Fellows Program, Richmond, VA May 2025 - May 2026
- Participant, AT3 Connections Program, Richmond, VA July 2024 – February 2025
- Member, National Society of Leadership and Success (NSLS) 2025 – present
- Commencement Speaker, Reynolds Community College, Richmond, VA 2026
